stimulate your skin
rejuvenate your complexion

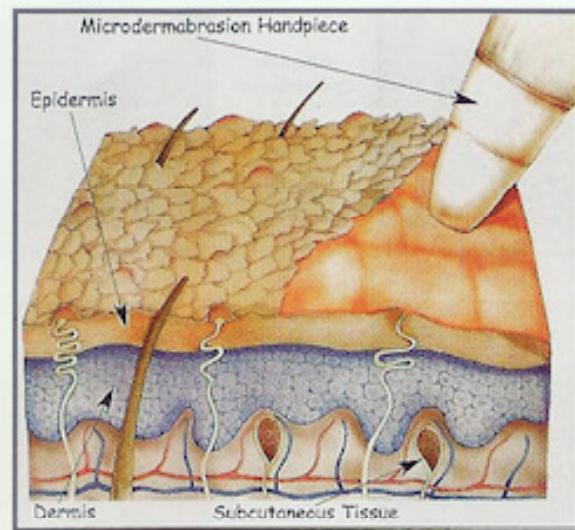

illustration: microdermabrasion removes dead surface skin cells and initiates cellular turnover at the dermal & epidermal levels. This treatment process improves skin collagen, texture, hyperpigmentation and overall appearance

microdermabrasion

Microdermabrasion is a simple non-invasive technique that improves the overall texture, tone and clarity of the skin. One treatment will freshen the skin giving it a healthy glow.

As with other skin rejuvenation techniques results will improve with a series of treatments.

microdermabrasion

how it works

Microdermabrasion is derived from an age-old treatment called dermabrasion. Microdermabrasion is world leading and less abrasive. This modern technology allows for an even dispersion of crystals while providing more comfort to the client.

The old surface of the skin is removed, while the vacuum suction stimulates the lower layers of the skin thus increasing collagen and elastin leaving your skin smooth, fresh and rejuvenated.

look better than you have in years

- even skin tone + color
- refined pores
- fewer breakouts
- softer + firmer skin
- healthy glow
- repaired elasticity
- more youthful appearance

smoother firmer skin surface

Microdermabrasion treatments erase epidermal layers at varying depths in a safe and controlled manner. This approach respects the integrity of the skin and promotes even healing. Maintaining cellular growth on the surface aids in a more youthful appearance.

renew

On average our skin is renewed approximately every 28 days. With age and environmental factors cell renewal slows down. Regular microdermabrasion treatments will amplify the cell renewal process, revealing a healthy balanced skin surface.

microdermabrasion

safe & effective alternative

world leading technology

Microdermabrasion is the most requested procedure today for skin rejuvenation. It compliments most treatment programs without compromising the integrity of the skin. Providing a safe, gentle and more importantly effective exfoliation for your skin.

fast & pain free

It leaves little to no redness. Aids in minimizing the most challenging skin conditions. Rejuvenates your skin to an optimal healthy state.

alternative

Traditional options from chemical & laser techniques to drug therapies may not be right for you. Perhaps they are inconvenient, or expensive. Microdermabrasion can easily bring you closer to healthier, younger looking skin.
